Office Action Summary

Application No.

10/829,046

Applicant(s)

HARADA, NOBUHIRO

Examiner

Seungsook Ham

Art Unit

2817

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 July 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 21 April 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by de Muro et al. (US '533).

De Muro et al. (figs. 4A, 4B, and 5) discloses a dielectric filter comprising: a dielectric block 100 having a plurality of resonator holes 106-111; an input/output electrode 403/407 capacitively coupled to one of the resonators at input or output stage, and extends to a mounting surface; the input /output electrode includes a conductor pattern formed on a first end face 401' or 405'. It is inherent that the transmission line/conductor pattern 401' or 405' has an inductance component which self-resonates at a predetermined frequency since the length of the transmission line is a quarter wavelength (col. 5, lines 5-10, also see fig. 7, transmission lines 707, 711 and col. 6, line 54 – col. 7, line 9).

Regarding claims 2, 4 and 8, de Muro et al. also shows the input/output electrode has a portion 113, 115 connected to the conductor pattern and capacitively coupled to one of the resonator at input or output stage. Alternatively, capacitive electrodes 113, 115 can be read as an end portion of the conductive line that is capacitively coupled to one of input or output stage resonators.

Art Unit: 2817

Regarding claims 3 and 7, de Muro et al. (figs. 4A or 4B) discloses the conductive line 401, 401', 405, 405' having a sharp turns (i.e., bent portion).

Regarding claims 5 and 6, de Muro et al. (figs. 4A or 4B) also shows a trap resonator 105 capacitively coupled to the input/output electrode 403 (see also fig. 5, element CA).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Schwent, Yim, Jun et al. and Rogozine et al. disclose a dielectric filter having a conductive pattern to eliminate unwanted frequency response.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Seungsook Ham whose telephone number is (571) 272-2405. The examiner can normally be reached on Monday-Thursday, 8:00AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571)-272-1769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
